

A placeholder plot on a grid. The grid has 8 vertical lines and 4 horizontal lines. A green line starts at the intersection of the first vertical line and the first horizontal line, passes through the intersection of the third vertical line and the second horizontal line, and ends at the intersection of the eighth vertical line and the fourth horizontal line. Three red dots are placed on the green line at the intersections of the second, fifth, and eighth vertical lines with the green line.

Placeholder plot

Task 3.4: marked costs for 50 L, 5000 L, 25000 L
